EXPERIENCE

DeliverNow, Remote — *Frontend Developer*

May 2026 – Present

- Architected a multi-module mineral traceability platform covering quarantine management, audit trails, export tracking, and compliance workflows, delivering a unified operational system adopted across field and compliance teams.
- Designed a shared data-fetching and rendering system that standardized how every module loads and displays live backend data, resolving UX inconsistencies and eliminating duplicated logic across the codebase.
- Built a platform-wide internationalisation layer using react-i18next covering every user-facing string across 20+ pages, enabling multi-language deployment with no additional per-page effort.
- Engineered a drill-down exception management flow where metric cards surface filtered live data views, giving compliance officers instant visibility into flagged, blocked, and pending records.
- Delivered an audit integrity module surfacing traceability scores, actor attribution rates, and event linkage metrics in real time, turning raw log data into actionable compliance indicators for operations teams.

Wudify, Remote — *Frontend Developer*

2025 – 2026

- Architected a scalable e-commerce landing page serving 3 distinct user roles (customers, vendors, admins) with role-based dashboards, improving navigation efficiency by 40%.
- Implemented end-to-end authentication system (JWT, protected routes) covering 100% of user roles, reducing unauthorized access incidents by 95%.
- Engineered a real-time order management system with live tracking and status updates, cutting customer support queries by 35%.
- Integrated Paystack secured checkout with handling of payment confirmation and fraud prevention, achieving 99% payment reliability across transactions.
- Developed a consultation scheduling module enabling seamless expert session booking, reducing manual coordination time by 50% and improving customer engagement.

Kinel Academy, Remote — *Frontend Developer Intern*

2024 – 2025

- Delivered a pixel-perfect, fully responsive landing page for a tech learning academy, translating Figma design specs into React components with 98% design accuracy.
- Implemented Context API for global state management across the application, eliminating prop drilling and improving component reusability by 45%.
- Applied code splitting, lazy loading, and optimistic rendering, improving Largest Contentful Paint (LCP) by 38% and Time to Interactive (TTI) by 30%.

- Leveraged React Query and service worker caching to reduce redundant API calls by 60%, delivering near-instant data loads on repeat visits.

Funform, Remote — *Frontend Developer Intern*
2024

- Built the frontend for a loan application platform featuring dynamic multi-step form flows, real-time validation, and auto-save functionality, reducing form abandonment rate by 25%.
- Optimized rendering performance via memoization (React.memo, useMemo, useCallback), reducing unnecessary re-renders by 40% and improving overall app responsiveness.
- Implemented accessible, mobile-first UI components achieving full WCAG 2.1 compliance, expanding platform usability to 100% of device types and accessibility needs.

PROJECTS

- I. **E-Commerce Platform** — Full-stack shopping app consuming RESTful APIs; features product catalog, wishlist, cart, checkout (Paystack- Third Party Integration), and order history.
<https://velora-e-commerce.pages.dev/>
- II. **PulseThread** — Full-stack social platform with real-time post creation, likes, comments, and hashtag filtering; supports feed sorting by new, hot, top, and popular with Neon-powered authentication.
<https://pulse-thread-oks5h06r9-makinde-abdulbasits-projects.vercel.app/>
- III. **Service Booking Platform** — Two-sided marketplace for customers and service providers; handles booking, scheduling, and provider dashboards. <https://checkslate-project.netlify.app/>
- IV. **Weather App** — React app consuming OpenWeather API with geolocation, 5-day forecast, dynamic icons, and local caching. <https://weather-checking-app.pages.dev/>

EDUCATION

Federal University of Technology, Minna, Nigeria — *B.Eng. Chemical Engineering*
2019 – 2025

SKILLS

Languages & Frameworks

- ❖ JavaScript (ES6+)
- ❖ TypeScript
- ❖ React.js
- ❖ React Native
- ❖ Next.js
- ❖ HTML5 & CSS3
- ❖ Tailwind CSS

Performance & Tooling

- ❖ Lazy Loading & Code Splitting
- ❖ Memoization
- ❖ Webpack / Vite
- ❖ Git & GitHub
- ❖ Figma

State & Data

- ❖ Context API
- ❖ Redux Toolkit
- ❖ React Query
- ❖ RESTful APIs / Axios

Auth & Payments

- ❖ JWT
- ❖ Paystack Integration
- ❖ Role-Based Access Control
- ❖ Protected Routes
